5 SECRETS REVEALED

How To Earn The Money You Want Doing Work You Love

By: Andy Fuehl

Are you earning all the money you want?
Do you enjoy your work?
Are you living the lifestyle you desire?
Do you have the freedom and security you want?
Are you financially free?

If you answered no to any one of these questions you are not alone. In this special report I will reveal the 5 secrets that will literally change your life and give you the freedom and security you have been looking for. Read on...

Don't Have All The Money You Want

We have a financial crisis. Most people are struggling financially and don't know how to get out of the trap. The sad reality is that 95% of all people at age 65 must still work or depend on their family, welfare or social security in order to survive according to the Social Security Administration.

Have you noticed how many senior citizens are employed at Wal-Mart these days? This is really sad. Their dreams have been reduced to working at Wal-Mart because they can't afford to retire. Can you image yourself working at Wal-Mart when you turn 65?

But wait there's hope. Let's look at the remaining 5%. The next 4% of people at age 65 can meet their basic needs. But that's it! This is still not looking good.

Only 1% of the population is really financially free. This means 1 out of every 100 people live the lifestyle they want at age 65 and don't have to worry.

I know you are wondering is there a way for me to be in the 1%?

There is a way but only when you truly understand the five secrets and take action. Which takes us to Secret #1...

Secret #1

How to Get Out Of the Trap

Andrew Carnegie said it so well when Napoleon Hill interviewed him. Carnegie said “To succeed you must love what you do.” I couldn’t agree more. Let’s discover why this is true.

Do You Hate Your Job? – You’re Not Alone

Everyone is looking for freedom and security and live a comfortable life. The problem is over 95% of all people hate their jobs in the United States... And it’s becoming a global problem. Recently in Japan where workers were dedicated to their company and stayed their entire working career are changing their tune. Over 72% of Japanese workers are now dissatisfied with their job and their employer’s.

So why are so many people dissatisfied?

They’re doing work they DON’T love. Does this sound familiar? Could this be your situation?

When you hate the work you do you will only do the minimum even though you are working very hard. Your enthusiasm is most likely low and your energy drained. I remember when I worked in Corporate America for Fortune 500 companies most people didn’t even smile. It was a struggle for them just to be there. My energy levels were drained and I was always tired during the week. But magically when the weekend came I had lots of energy and did what I enjoyed. Can you relate to this phenomenon?

Fire Your Boss

In fact **more people than ever are seeking ways to fire their boss.** There are over 33 million entrepreneurs in the United States alone. More and more people who are being downsized by corporations are now seeking to become entrepreneurs. **These people are taking control of their lives and want to become financially free.**

But wait; there is a challenge that has to be overcome...

Statistically over 50% of all businesses fail in the first year. More shockingly is approximately 95% of all businesses fail in the first 5 years. This doesn't look to good does it? In fact this looks like quite a scary proposition to leave your job and become an entrepreneur, doesn't it?

On the surface it does. The challenge is most people look at the statistics and say that's too risky for me. In reality **being an entrepreneur is far less risky than working for someone else** when you know the secrets...

Let me give you an example to help illustrate the risks. Let's assume you earn \$1,000 per month from your job. I'm sure you are making more but I am using \$1,000 just to make the numbers easy. If you are downsized tomorrow how much money are you earning now?

ZERO!

That's not a good situation to be in, is it? Of course not.

Now let's look at being an entrepreneur. Let's assume you have 1,000 customers that purchase something from you at \$1 each month. You're earning \$1,000 per month. Assume now that one customer stops purchasing from you. How much do you have left at the end of the month?

\$999.00

I don't know about you but being an entrepreneur seems a lot safer than being employed. In fact I know it is. **I was downsized in 2001. I went from a six-figure income to zero overnight**. The bad part was I didn't know the secrets to being a successful doing work I love that I'm going to share with you.

The first thing you must do is Make the Decision to do work you love. Make the commitment right now that you are going to Take Control of Your Destiny.

Good Job!

The next question now is how do I become a successful doing work I love?

Which takes us to Secret #2...

Secret #2

Do Work You Love And Get Paid Well

To become a successful entrepreneur **don't quit your job tomorrow and dive into a moneymaking opportunity**. This is what most people do. They see and hear someone tell them “You can make millions in real estate” or “You can make millions from the Internet” or “You can make millions in _____” you fill in the blank.

I'm sure you have seen and heard these claims. The truth is they all work. The bad news is it doesn't work for everyone. Why is that you may be asking?

The key to being a successful entrepreneur is to find your true purpose in life. This is your passion, something that you would actually do for free. Now this may seem counter intuitive. And you're right it is. Most businesses fail because the person who started the business gave himself or herself a job. They went into business to make money instead of doing what they are passionate about. Do you know anyone like this?

I work with clients all the time and not doing what you're passionate about is the number one problem that I see constantly. The amazing part is *when you find your true passion and express your true purpose in life it is as if you cannot fail*.

Let me give you an example of this. I had a client Ray who went into real estate investing. In the hottest market ever he managed to loose over \$70,000. He was in a lot of trouble. He came to me and asked me what he was doing wrong. I looked at the system he was using and it was a good system. After digging a little bit deeper I discovered that he went after the money instead of his passion.

As soon as my client Ray discovered his purpose in life and followed his passion, **within 6 months he was out of debt and making lots of money in his new business**. His new business was selling Health Care Products through a network marketing company. *It is as if he could not fail*.

I too had a similar experience after being downsized. I thought that by using the skills I developed in my corporate career that I could become financially free in my own business. Guess again. I failed miserably. In fact it took me several failed businesses to discover the problem...

Once I focused on my true passion, which is so different than what I used to do, I went from being **unemployed to being a millionaire in less than 3 years**. This is not to impress you but to impress upon you that doing work you love is absolutely a must in order to succeed.

Find what you are passionate about and explore the possibilities of how you can turn that into a business. When you do what you love you will be enthusiastic and you will succeed!

But you may be saying well that's fine but how am I going to pay the bills if I quit my job and start my own business?

Excellent Question.

This takes us to Secret #3...

Secret #3

Fire Your Boss Slowly

Sure it would be nice to get out of a job you don't like right away. I don't blame you for thinking that. I did too. There are bills to pay and you don't want to set yourself up for failure.

Keep your job for now. That's fine because you know **it will only be temporary** and the money you earn from your job will keep your mind from going crazy because the bills are piling up. You know what I'm talking about, the little voice inside your head that makes lots of noise especially when money is tight.

The secret to becoming a successful entrepreneur is not to quit your job right away. Stay there and work your business part time even if you can only work your business one hour per day. The important part is to **work your business consistently**. This is where most people have the challenge. Make sure you plan regular hours to work on your business. **Consistency is the key.** The more consistent you are the faster you become successful.

I know you're thinking, so when can I quit my job?

Quit your job when the income from your part time business exceeds your expenses. When your business produces more income than what your living expenses are it's time to quit. You can no longer afford to go to a job. At this point going to your job takes away time that you could be spending in your business.

When you get to this point and actually quit your job, you have now removed the lid on your income. The only limitation is your imagination.

Remember: If you can imagine it and believe it, you can achieve it!

That can't be it, can it?

Hold on there's more.

That takes us to Secret #4...

Secret #4

Tune Up Your Mind To Earn More Money

I know what you're thinking. Does tuning up your mind really work?

YES!

Everything starts in thought. And as Zig Ziglar puts it "If you aren't getting what you want, you may have some stinking thinking."

Zig Ziglar is right on the money. Your results (and that means every result you get) are nothing more than a reflection of what's going on inside your mind. If you are achieving great results that means you have great thinking. However if your results are not so good, you're getting exactly what you're thinking about.

Let me explain how this works. **Donald Trump at one time lost everything** he had and then some. He went deep in debt after having millions. It was an unfortunate time for Donald and you may be wondering what does this have to do with me? Good question. It has everything to do with you because of the way you are thinking. Read on...

Instead of giving up and becoming a homeless person, **Donald Trump regrouped and came back in a few short years even wealthier and more powerful than ever.** How did he achieve this? It was his thinking. He thinks like a billionaire. Poverty and being wiped out doesn't even cross his mind.

What most people do which is a big mistake is they give up when the going gets tough and say things like... "It's too hard." Or "Money doesn't matter that much." And the list goes on and on. These are nothing more than excuses. **But why do we have so many excuses?**

It is our conditioning! You have been programmed to think like a poor person instead of a rich person. Before you start blaming everyone around you especially your parents remember: It's nobody's fault. Everyone around you did the best they could with what they had. They couldn't give you what they didn't have.

I could blame my parents for my problems but the truth is they didn't have rich thinking to give me when I was struggling. The only thing they knew how to do was go get a job and work for someone else. **There is a bright side to this...**

You can change your thinking. You're in Control of Your Destiny. So how do you do change?

You change your thinking by reading good books, listening to empowering tapes and CD's. Stop watching TV and listening to the radio with all that negative garbage! **Fill your mind with things that will help improve your life.** If you think watching Jerry Springer or soap opera's on a regular basis is good for your mind then there are only two words I have for you.

Your Broke!

Ouch! That hurts. It's reality and I hate to see you suffer. Someone had to tell you just like I had to learn.

What you feed your body is important. Wouldn't you agree?

If you eat junk you will feel terrible. Imagine eating McDonalds three times a day for the next 30 days. Do you think your body will have some adverse affects?

You bet.

The same holds true for your mind. You must feed your mind empowering material in order to succeed.

Listen to or read empowering material every single day for at least 30 to 60 minutes per day. You can listen to great tapes and CD's in your car while you drive. You can read a little bit before you go to bed or when you first get up. When you do this you feed your mind and soon your thoughts will produce much better results.

So is there anything else I have to do?

Yes there's one more thing.

This leads us to Secret #5...

Secret #5

Who You Associate With Determines Your Financial Results

There is one last thing to do. **The people you associate with regularly actually determine your financial results.** Now I'm not suggesting that you dump your friends and family today. They love you and only want the best for you.

However if your friends and family are negative, consider hanging out with them less. **Find new friends who are upbeat, positive and make the kind of money you want.** When you associate yourself with people who are more successful, you begin to start thinking like they do and before you know it, you will be earning lots of money too.

When I started my journey to success I didn't realize this key step. Once I did I started to associate with people who are wealthy and positive. The results speak for themselves. But you may be asking, why would a wealthy person want to associate with me?

Wealthy people from my perspective are the most giving people around. They remember where they came from and are willing to give back. If you're serious about your success and I'm sure you are otherwise you wouldn't have read this far, then wealthy people will help you as well. All you have to do is ask. When you ask and are sincere, wealthy people will help you and mentor you.

Having a mentor is key. I asked many times and some successful people turned me down but others said yes. In fact Dolf de Roos, New York Times best selling author of Real Estate Riches is now a good friend and business partner. All because I asked. I also provided value to my mentors by offering to do things to help them make more money and be more successful. Providing value is easy. You have a unique talent and others will be grateful to you.

Remember: you become like the five closest people you associate with. In fact your income is the average of the income of these same five people. The choice is yours. **Who will you now associate with?**

I encourage you to find a mentor to help you. Find someone who has achieved what you want and ask them for help. You will be glad you did.

Now let's put it all together...

Putting It All Together

You have learned the five secrets to making the successful transition doing work you love and getting paid well for it. To recap the steps:

- First: Decide to do work you love. Take control of your life and your destiny.
- Second: Find your purpose and passion in life. Find a business that expresses your purpose and passion.
- Third: Start your business and work it part time until you make enough money where you can't afford a job. Then quit your job.
- Fourth: Tune up your mind by reading and listening to empowering material. This is a critical step. The more you tune your mind, the better your results.
- Fifth: Associate with positive and successful people. Find a mentor that has achieved the success you are looking for and ask for guidance.

I know these five parts seem simple - almost like I am making this all up. The truth is this; **I used these same 5 steps to quit my corporate job of over 15 years and become a millionaire...**

And I have taught thousands of people to do exactly the same thing.

My personal mission is to create 10,000 millionaires in the next 5 years -- it would be great if you were one of them.

This report is a taste. I know if you live by these secrets you will be successful AND most people need more training and more support to actually become a millionaire doing what they love to do.

I believe in what I teach so strongly that **I am going to give you \$2790 of my training and services to you right now absolutely **FREE**.**

All you have to do is be a person of action... Turn the Page and **Say YES**.

To Your Success,

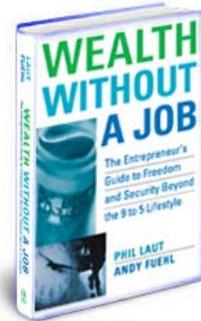

Andy Fuehl

Wealth Without a Job

The Entrepreneur's Guide to Freedom and Security
Beyond the 9 to 5 Lifestyle.
by Phil Laut and Andy Fuehl

Most “How To” Books Only Tell You HALF The Story!

This 278 page book by Phil Laut and Andy Fuehl presents proven methods that teach people how to separate emotions that hinder their success in business ownership from the emotions that help them to succeed. Many of these strategies use the combined money psychology that Phil developed over the years and a scientific method that Andy applied called Neuro Linguistic Programming, teaches people to change their way of thinking in order to change their way of life.

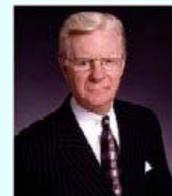

Wealth Without A Job shows how to make the emotional and psychological adjustments required to become successful as your own boss, on your own terms. Andy Fuehl used these very same methods to go from unemployed to millionaire in under three years and so can you.

"Standing out in a plethora of 'get rich' books, *Wealth Without a Job* goes beyond the predictable 'set goals, work hard, and pretend to be happy' approach; rather, it inspires, cajoles, and leads readers through known and tested paths to financial freedom. Phil Laut and Andy Fuehl don't just seek to change your wealth, however. Be prepared for a deeper understanding of both economics and how your mind thinks and works, so that you and your goals are driven towards each other. A compelling read."

-- **Dr. Dolf de Roos, author of the New York Times bestseller, *Real Estate Riches***

"I was fortunate enough to learn many years ago that working is the very worst way to earn money. Work is made for us, we are not made for work. Our work is meant to provide us with satisfaction. We should do what we love and love what we do."

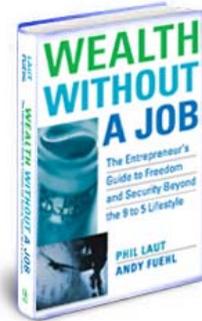

--**Bob Proctor, author of the best selling book, *You Were Born Rich***

"Phil Laut and Andy Fuehl are money masters! The information and the application of their wisdom is what will allow you to attract the wealth you deserve."

--**Jeffery Combs, author of *More Heart than Talent***
