

## **Traditional Schooling Hurts Entrepreneurs Dropouts Out Perform College Grads!**

Dear Friend,

We have a big problem today. **Over 50% of all businesses Fail in the first year.** Worse yet, over 95% of all businesses fail in the first 5 years.

The reason why all these businesses fail...

Is because of traditional education!

The traditional education system is not what we have been led to believe it is. We are told that we have a great education system and that our kids are learning the right things to become successful.

The truth is... the traditional school system is only teaching our kids how to be employees.

They're learning a lot of useless things that really won't help them in the real world. Not only that, but because of the way the school system is set up many kids are actually being held up and slowed down.

Don't believe me?

That's ok. But let me ask you something. When is the last time you used algebra, calculus or history in real life?

My guess you haven't.

### **Quit Blaming Your Teachers It Won't Help You**

Now don't start blaming the teachers. It's not their fault. They have to do what the system tells them to do. Remember they are just employees who do what they're told.

There've been many articles written about how our nation as a whole is being dumbed down. Tests that are given these days are becoming easier so more kids can pass them.

Does this seem like a problem to you or is it just me?

A graduate of our Entrepreneur Training Seminars sent me an interesting article I wanted to share with you. It's about the difference between traditional education and home school education. I think you will be amazed by what it says.

The article shows some serious problems with our traditional school system.

I personally went through the traditional school system and never felt like I really received a good education. As an Entrepreneur this becomes even more critical!

Let me explain...

## **Did You Learn How To Become Broke? The Answer May Scare You!**

As children we're sponges. We learn very quickly. And what ever our minds are filled with gets absorbed. Children believe everything because they have no references to compare with and in the early stage of development the critical factors are not there yet to reject information.

This is kind of scary isn't it?

It's both good news and bad. However that's reality. Let's continue...

As we grow up we're taught by our parents until we go to school. If your parents spent a lot of time with you and taught you the basics you may be far ahead of the rest of the crowd by the time you get to school.

Chances are your parents just like mine didn't spend that much time with you. That's not all bad though. They did the best job they could with the information they had. You can't blame them.

## **It's All Your Mother's And Father's Fault!**

I know you want to blame your parents but just stop right there.

I did this for years and let me tell you it isn't going to help you get wealthy.

Remember, your parents gave you everything. They couldn't give you something they don't have.

Now that we have that out of the way, read on...

Most likely your parents at this early stage of development taught you about money and having a job like mine did. If your parents worked at a job and were paid by an employer for their work they most likely talked about this with you in their presence. Even though they may not have directly explained things to you, you were intently listening trying to figure out what was going on.

Remember: Kids are curious and they want to learn everything.

So your parents most likely taught you that you have to have a job to make money and that there was never enough money when you work in a job.

Sound familiar?

This was a description of my family.

To continue our education... we went to school and we had teachers that taught us. Now let's think about what teachers are.

Teachers are employees aren't they?

Of course they're employees.

So the only thing that a teacher can teach you is how to be a good employee. How can they possibly teach you how to **Become an Entrepreneur** being an employee themselves.

## **A Harvard Degree - Won't Help You Become Rich**

Even in Harvard Business School you don't learn how to **Be an Entrepreneur**. This seems contradictory to popular belief... But it's true. They only teach you how to be a better employee.

Let's examine Harvard Business School more closely and you'll see what I am telling you. The professors at Harvard Business School have a what?

A Job!

You're catching on. Good Job!

Since the professors have a job and no practical experience being an Entrepreneur, how can they possibly teach you to how to run your own business and be successful if they haven't done it themselves?

Quite frankly, it's impossible.

If they tell you they can, they're lying to you.

If you attended Harvard Business School you'll only learn how to get a better job. That's it. That's all they can train you for. If they teach you how to run your own business it's purely theory. There's no practical experience behind the theory.

Don't believe me?

That's ok. Don't take my word for it. Ask my friend and coauthor of *Wealth Without a Job*, who went to Harvard Business School and failed miserably as an Entrepreneur early on.

Now if you went to a regular college do you think it's going to be any better?

**Absolutely not!**

I have a Masters Degree in Electrical Engineering from Illinois Institute of Technology and quite frankly the only thing it ever did was get me a better position in corporate America.

It actually hurt me becoming an **Entrepreneur**.

The way I succeeded was I had to unlearn what I learned at school and Learn Entrepreneur Skills.

I learned from people who succeeded as Entrepreneurs instead of going back to school. You can only learn from mentors who have been there and done that.

So if you want to Become a Successful Entrepreneur you must Find a Mentor Who is a Successful Entrepreneur and Learn from that Person.

Unfortunately we can't start over as kids.

But, now that you know better, you can educate your kids if you have them to think differently and help them become independent and successful Entrepreneurs so they don't have to go through what you and I did.

### **It's Not Too Late For You**

It's not too late for you either...

I was able to retrain my mind to think like an Entrepreneur and so can you. It's simple and easy but it does take Commitment on your part. Without commitment it will never work.

The truth is, Most people give up too quickly!

I hope you're not one of those people.

Most likely you're not because you've read this article this far.

So what's the next step you may be wondering?

The next step is to **Now Make the Decision to Be a Successful Entrepreneur**. Then Commit to doing what ever it takes to make it happen. Go ahead and Make the Decision and Commitment to Become a Successful Entrepreneur...

I'll wait right here until you do.

Don't continue reading until you Make the Decision and Commitment to your success.

Go ahead it's ok.

This is usually the hardest step. Once you Made the Decision and Commitment to your success you probably felt a bit of relief, didn't you?

I bet you did. That's typically what happens.

Congratulations! You are now on your way to becoming a **Successful Entrepreneur**. You are a champion!

### **I Must Be Crazy**

The next step is to educate yourself. I'm going to help you make your education process easy and inexpensive. When you invest a mere \$24.95 and Get a Copy of my best selling Book [Wealth Without a Job](#), I will scholarship you Two tickets to my 3 Day [Wealth Without a Job Intensive Entrepreneur Training Seminar](#) a value of \$2,790 for FREE.

I'm committed to your success. Are you?

For a small commitment on your part I'm going to commit to giving you a Three Day Course Valued at \$2,790 for you and a guest and to showing you how to succeed using the methods in [Wealth Without a Job](#) so you can Take Control of Your Destiny and Make the Money You Now Want.
